## **3.0 Understanding the Illinois Assessment of Readiness District and School Evidence Statement Analysis Report**

### **3.1 General Overview**

The IAR District and School Evidence Statement Analysis Report is a two-page report that analyzes the performance of the IAR Evidence Statements at a state, district, and school level for each operational item on the Spring Illinois Assessment of Readiness. Information is reported for each grade level and content area.

### **3.2 Description of Illinois Assessment of Readiness District and School Evidence Statement Analysis Report**

Sample reports and descriptions are provided on the following pages for the English Language Arts/Literacy and Mathematics Evidence Statement Analysis reports.

#### **3.2.1 Sample Illinois Assessment of Readiness District and School Evidence Statement Analysis Report – Page 1**

Page 1 of the Evidence Statement Analysis Report shows the performance by evidence statement in graph form.

The first report below shows an example of a Mathematics report at a district level. The second is an ELA/Literacy report at a school level.

Understanding the  
IAR District and School  
Evidence  
Statement Analysis  
Report

**A. District and School Information**

Reports are provided at a district level as well as for each school associated with that district for the district and school listed on the report.

**B. Description of Report**

The description of the content area (English Language Arts/Literacy or Mathematics) assessed, grade level assessed, and assessment year is located in this area.

**C. Students with Valid Scores**

The report presents the average percent correct by evidence statement for students who have IAR reportable summative scale scores in the Spring administration. Reportable scores are those records that have met attemptedness, are non-voided records, and are without suppression codes that have excluded them from aggregations.

**D. Graph**

The average percent correct by each item, combined at an evidence statement level is represented on the graph at a state level, district level and, for the school report, at a school level. A legend is provided to show which lines represent each level shown. State symbols are connected with a solid line. District and school symbols are not connected. District and school symbols are not connected because, depending on the form assignment selection taken at the school and district, all evidence statements may not be represented. If an evidence statement is not represented at a school or district level, there will not be a symbol on the chart for that evidence statement listed. If a symbol is on the chart at zero percent, this indicates that evidence statement group had 0% achieved out of the maximum points possible for that school or district.

**E. Evidence Statement and Difficulty Order**

Items on the IAR assessment are written to IAR Evidence Statements, which are based on the Illinois Learning Standards. Each operational item on the assessment is combined into an evidence statement group. ELA/L items may be aligned to more than one evidence statement. These items are aligned on the report in every evidence statement group that applies to that item. This means one item could be represented on the report multiple times depending on its alignment. Each evidence statement group on page 1 of this report contains one item or multiple items at the State level.

The evidence statements are placed in order on the graph from most to least difficult. This difficulty order is determined by the performance level of items based on the State level. Evidence statements for which the State average points achieved versus the maximum points possible was lower are considered the more difficult categories.

**F. Writing Tasks**

This section charts information related to the performance of the writing tasks that are included on the IAR English Languages Arts assessment.

**G. Written Expression and Writing Knowledge**

Written Expression includes the development of ideas, organization, and clarity of language that the student demonstrates in the written response.

Writing Knowledge assesses students' command of the conventions of standard English, including grammar and usage.

## H. Prose Constructive Response (PCR)

This section breaks down the writing tasks by the three types of PCR items included on the IAR ELA assessment. The PCRs ask for a student response that analyzes some aspect of either literary pieces or informational pieces in the categories of Research Simulation and either Literary Analysis or Narrative Writing.

## I. Legend

The legend for this graph provides a symbol for for State, District, and School values.

## A. Illinois Assessment of Readiness Evidence Statement

Evidence Statements are listed in the same order as on the page 1 graph, from most to least difficult.

## B. Illinois Learning Standard(s)

The Illinois Learning Standard(s) linked to the IAR Evidence Statement is listed in the third column. An evidence statement could be connected to multiple standards. There are some evidence statements that do not directly align to a specific Illinois Learning Standard. For those statements that are considered Modeling or Modeling & Reasoning - Securely Held Knowledge, that verbiage is indicated on the chart on page 2. Additionally, some integrated evidence statements are across multiple domains and are also not firmly linked to a single Illinois Learning Standard. Those statements will indicate "Multiple" on the report.

**C. Domain**

The Illinois Learning Standard Domain level is listed in this column.

**D. Item Type**

The item type column includes all item types for the items included in each Evidence Statement category. If more than one item type applies, all item types will be listed in the "Item Type" column on page 2 of the report. Math item types are Math - Type I (tasks assessing concepts, skills and procedures), Math - Type II (tasks assessing expressing mathematical reasoning) and Math - Type III (tasks assessing modeling/applications). English Language Arts / Literacy item types are Prose Constructed Response (PCR), Evidence Based Selected Response-Multiple Choice (EBSR) and Technology Enhanced Constructed Response (TECR).

**E. Student Count**

The student count represents the number of students whose form of the assessment contained an item or items written to the evidence statement listed in column A. The count may differ by row as there are different forms of the assessment and not all forms include all items or evidence statements.

**F. Additional Information**

Links to more detailed information on the IAR Evidence Statements and Illinois Learning Standards are provided at the bottom of the report.

Page 2 of 2

### A. School Information

Reports are provided at a school level by student.

### B. Description of Report

The description of the content area (English Language Arts/Literacy or Mathematics) assessed, grade level assessed, and assessment year is located in this area.

### C. Illinois Learning Domain and Standard

All operational items are combined into the Illinois Learning Domain and Standard group into which it applies. Some items represent multiple standards and may therefore be included in multiple groups on this report. If a domain has more than one standard for that grade level, then a total column will also be provided. A description of the domain and standard headings are in **Appendix A**.

A more descriptive explanation of the standards and their domains can be found at the link:

<https://www.isbe.net/Pages/Learning-Standards.aspx>.

### D. State Average Percent Achieved

This column provides the average percent achieved for all students in the state with valid scores for each domain and standard group at an operational form combination. Domains with multiple standard groups will still be included in the total.

### E. Student Percent Achieved

This column shows the percent achieved of the total points possible each student listed received in each domain and standard group. Domains with multiple standard groups will still be included in the total.

### F. Core Form

This column indicates the operational core form taken by each student listed for the the Spring administration. The form is determined by the core operational form. Form codes starting with the letter P are paper, forms starting with the letter O are online, and forms starting with the letter A are accommodated forms. Information for all columns (Total Points Possible, Student Percent Achieved, State Average Percent Achieved) are for that student's individual operational form combination. Comparisons cannot be made for students across domains unless both students took the exact form for the report administration.

For example, the student listed may have taken a form 15 or a text-to-speech form as per their form assignment but the core operational form for both of these may have been core form 1 or 2.

### G. Student Information

Students will be listed by last name, first name in alphabetical order. Students are listed if a valid summative score is available for those students whose score has not been suppressed.

### H. Modeling and Reasoning

Mathematics includes Evidence Statements that are in the category of Modeling and Reasoning. When linked to the Common Core State Standards, Modeling and Reasoning items are considered either On Grade Level (OGL) or Securely Held Knowledge (SHK). On Grade Level items are aligned to standards that are the same grade as the grade of the current assessment. For Example, a Grade 3 Math assessment may have Modeling and Reasoning items that are aligned to Grade 3 level standards (3.OA.A, 3.MD.B). These are considered On Grade Level. Securely Held Knowledge items are aligned to standards that are a grade below the grade of the test given. For example, a Grade 3 Math assessment may have Modeling and Reasoning items that area aligned to grade 2 standards (2.OA.A, 2.MD.B). These are considered Securely Held Knowledge.

**I. Additional Information**

Links to more detailed information on the IAR Evidence Statements and Illinois Learning Standards are provided at the bottom of page 2 of the report.

**J. Writing Categories**

English Language/Literacy reports include a breakdown for writing categories. Written Expression includes the development of ideas, organization, and clarity of language that the student demonstrates in the written response. Writing Knowledge assesses students' command of the conventions of standard English, including grammar and usage.

**K. Prose Constructed Response (PCR)**

English Language/Literacy reports include a breakdown for Prose Constructed Response (PCR). This section breaks down the writing tasks by the three types of PCR items included on the IAR assessment. The PCRs ask for a student response that analyzes some aspect of either literary pieces or informational pieces in the categories of Research Simulation and either Literary Analysis or Narrative Writing.
